

I, Sean Purdon, agree to provide Emile Victor with 10% of gross (pre-tax, and pre-apple) income from the iOS version of The UQ Student Assistant until such time as a mutually beneficial and agreed upon change of contractual requirements occurs.

In return, Emile shall provide advertising services to at least the same level as currently provided for the android version, and will provide access to all program code and graphic art. Sean Purdon shall have exclusive license over the development of the iOS version of The Student Assistant UQ for all current and future apple platforms.

There exists no requirement for either version to feature the same set of features (for example, Sean may want to include Timetable @ UQ integration alongside UQRota).

If UQ requests purchase of the application, separate payments go to either developer. At such a time, should it occur, another agreement such as this one may occur, with Emile being able to attempt to claim no more than 10% of the final amount offered to Sean. If an offer is made, both parties must consult each other before making any decisions.
